

Apple iOS

Bring up the list of wireless networks and make sure that the 'eduroam' SSID is present.

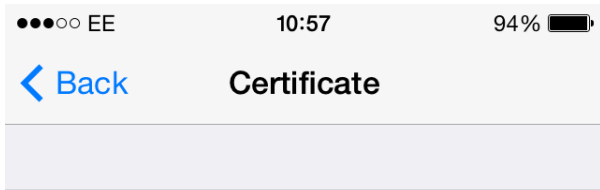

Click on 'eduroam'.

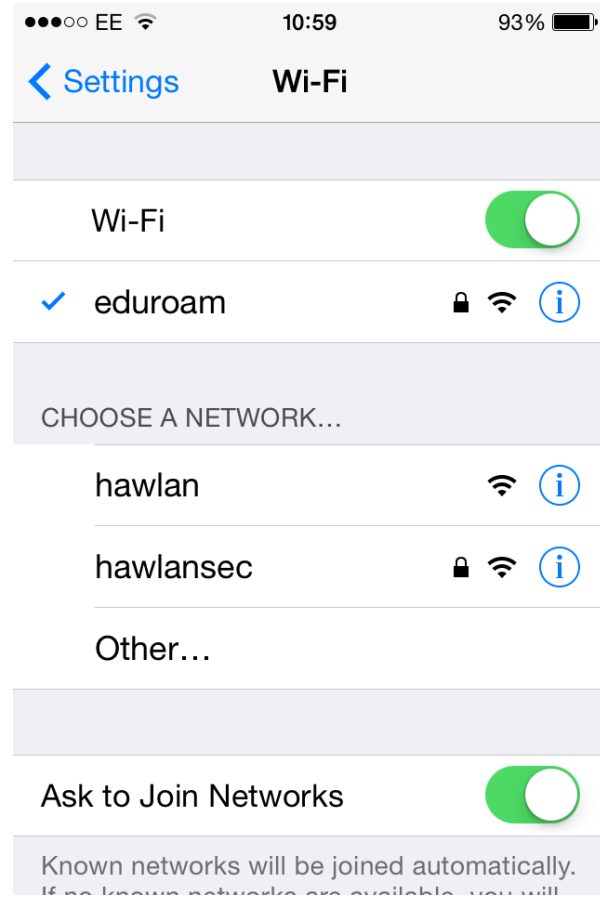

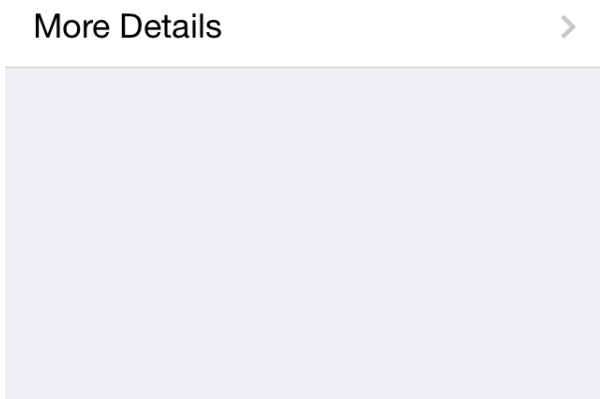

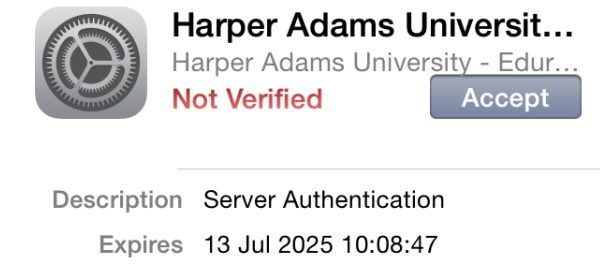

After clicking on 'eduroam' the authentication prompt will be displayed.

The username must be the users' ID number with @harper-adams.ac.uk at the end of it. Eduroam will not work without the realm at the end of the username.

The password must be the users' domain password.

Once authenticated a certificate prompt will be displayed - Click on the 'Accept' button.

Once the certificate has been accepted the user will then be connected to the 'eduroam' wireless network.

Open a browser and check Internet connectivity.
