

## Windows Mobile

Bring up the list of wireless networks and make sure that the 'eduroam' SSID is present.

Click on 'eduroam'.

After clicking on 'eduroam' the authentication prompt will be displayed.

Connect using 'username+password'

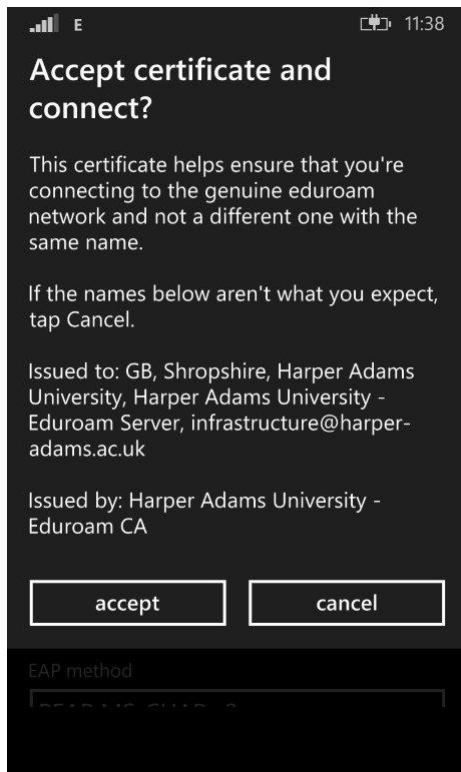

The username must be the users' ID number with @harper-adams.ac.uk at the end of it. Eduroam will not work without the realm at the end of the username.

The password must be the users' domain password.

Server certificate validations is set to 'always ask me'.

EAP method is set to 'PEAP MS-CHAP v2'.

Tap 'done' when complete.

Once authenticated a certificate warning will be displayed - Tap on the 'accept' button.

Once the certificate has been accepted the user will then be connected to the 'eduroam' wireless network.

Open a browser and check Internet connectivity.
