

Interested in a career in

Applied Crop Science?

2015 Summer Research Placements at HAU

We are looking for UK undergraduates to work on their own industry supported project for 7 weeks based at the *Fresh Produce Research Centre* at Harper Adams University within a group of scientists covering a broad range of agronomy and crop physiology research.

What do you get?

1. £100 per week for 7 weeks
2. Free accommodation
3. Ownership of your own project
4. Interaction with fresh produce businesses
5. Research mentoring

Projects you could run:

1. **Phenotyping** disease expression in leafy vegetables.
2. **Tracking vineweevils** in strawberries – where do they go?
3. Are genes for **climate resilient** vegetables in wild crops?
4. Can landscape plantings **cool buildings**?
5. Do **LED lights** make bagged salads last longer?
