# Interested in a career in **Crop Science/Agronomy?**

## 2012 Summer Research Placements at HAUC

We are looking for UK undergraduates to work on their own industry supported project for 8 weeks based at the *Fresh Produce Research Centre* at Harper Adams University College within a group of scientists covering a broad range of agronomy and crop physiology research.

### What do you get?

1. £200 per week for 8 weeks
2. Ownership of your own project
3. Technical support
4. Interaction with fresh produce businesses involved
5. Research mentoring

### Projects you could run:

The effect of **deficit irrigation** on onion rooting  
Alternative substrates for **peat-free** soft fruit production  
**Genetic diversity** in nitrate accumulation in Rocket leaves  
**Optimising fertiliser** rates and sources in young apple trees
